SaaS

ERP

Our ERP solutions provide comprehensive features to optimize your day-to-day E-commerce business operations including inventory, orders, shipments and payments. All features and cloud-based architecture support your business from any dimension.

Intelligent demand forecasting and replenishment recommendations to meet your KPI! Never again have cash tied up in excess inventory or lose sales due to insufficient stock.

Help manage inventory supply and purchase. Automate the purchase order creation process based on your own workflows.

Total control reordering process- identify the purchase plan, necessary contract approval, and create purchase orders in one click.

Make your purchase process simple and effective.

Your finance team will have the real-time financial insight for information related to your inventory and sales.

No more guessing from your quarterly and yearly planning.

Improved Business Productivity

Intelligent analysis of sales, gross profit, advertising, and inventory data, saying goodbye to manual statistics.

Keep you posted

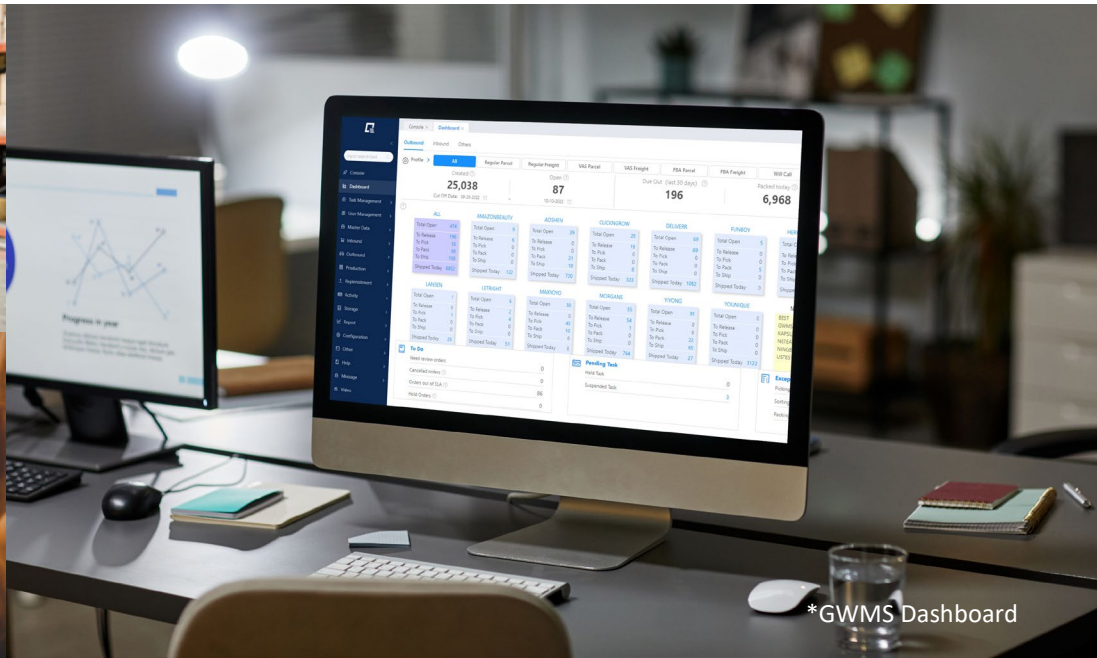

Get email alerts for customer feedback, reviews, and order process error from channels like Amazon. In this way, you can take action quickly when needed. If a buyer is unhappy, you'll know right away.

Optimize your marketing budget

It's critical to understand which ad platforms and marketing campaigns work best for you.

Plug & Play integrations

Connect to multiple platforms and channels in minutes. Built-in integrations are designed to sync transactions in real-time. Your business is always ready even during the busiest time like Black Friday.

SaaS

WMS

What is WMS?

WMS provides warehouses and distribution centers with tools to automate fulfillment operations and maximize productivity.

Why choose our SaaS(WMS) solution?

Our WMS optimizes the management of operations with location-based process rules for all your warehouses. Your warehouse manager in each warehouse can define zone-based rules, fixed and dynamic picking locations, and clear location capacities. Get real-time visibility into inventory status across warehouses with ease.

Meet with BEST SaaS team for system implementation with zero downtime. Receive fast support from world-class support team.

Advanced Features

Based on your preferred criteria, creates the most efficient routes through the warehouse for your daily operations. Cloud-based solutions connect clients seamlessly to avoid local installation and gain total visibility and control.

Power your own warehouse operations with the same technology used to manage inventory and fulfill orders for over [warehouse count, inventory count, and order count] around the world.

SaaS

OMS

SaaS supports over 100 E-commerce platforms.

Smart Shipping Strategy

Based on the ship from and to locations and how fast the order needs to get there, we developed system algorithm to provide the best fit of carrier and service for our customers.

SaaS supports all the major retail stores in the U.S.*

Real-time Inventory Management

Real-time inventory tracking to help you manage the inventory status in your multiple locations. It helps you optimize inventory levels to meet your demands while minimizing excess stock.

*Additional development may be required.

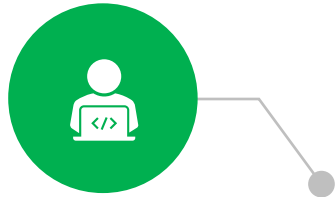

SaaS

ERP+WMS+OMS

Self-Development

We developed the industry-leading ERP, WMS and OMS solutions.

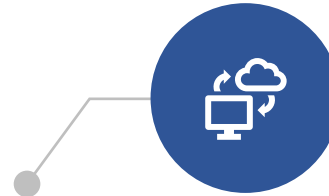

Few companies in the industry can provide complete integrated services like we do.

Cloud-Based

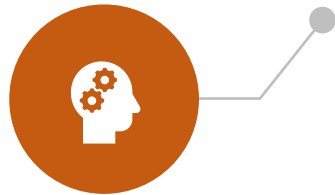

SaaS is cloud-based, and it is built on the trusted Microsoft Azure platform.

You do not have to purchase expensive computers, software, and licenses for systems. We handle everything for you.

Smarter Then Ever

Smartly optimize marketing budget, pick process with waves/tasks for different type of orders, generate smart report, and much more. Everything is smart.

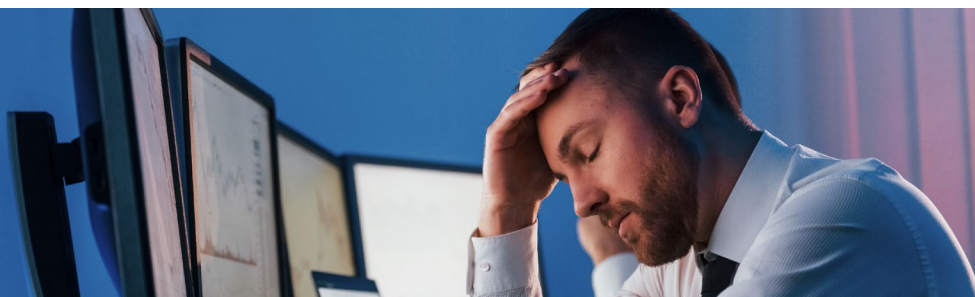

Data Management

Real-time cloud backup of data in multiple global locations.

We developed a real-time inventory tracking to help our customers manage the inventory status in their own multiple locations.

Have you encountered these problems before?

- *It's troublesome to process orders from many stores. The fulfillment time is way too slow, and it is easy to receive customers' complains or refund requests.*
- *I don't exactly know my inventory status. It was often out of stock or stuck with backlog. The cash flow is a challenge.*

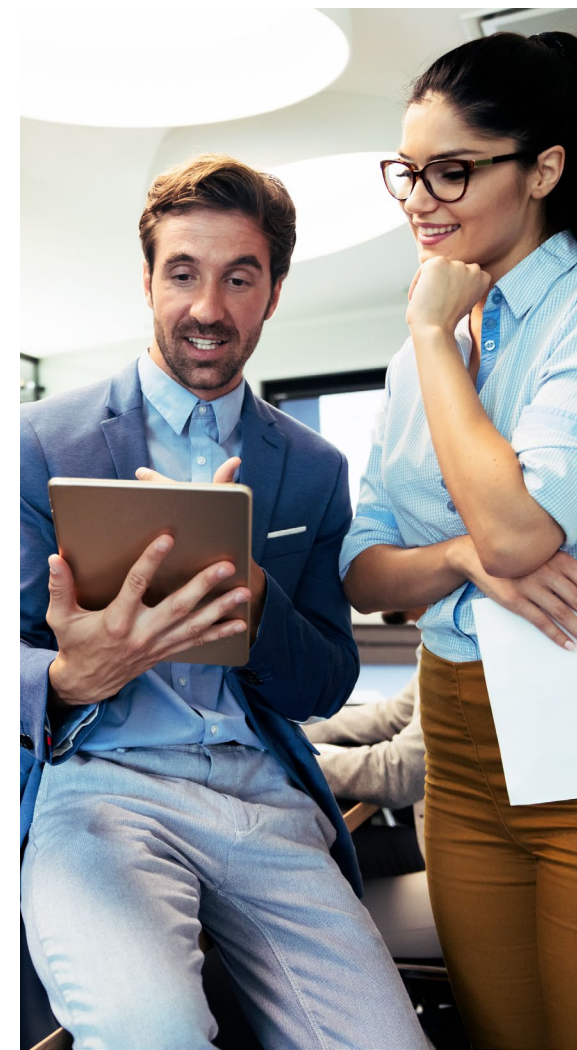

SaaS Will Help You Solve Them!

Automatic Order Rules

- Support order synchronization, order printing and fulfillment.

Full Chain Management and Control

- Guide your decision-making based on data science.
- SaaS generates intelligent replenishment strategies based on the key data, which can be fast and accurate, reduce 50% of the inventory occupied funds!

Warehouse Owners

- 🙄 Long billing period, huge cash flow pressure.
- 🙄 Slow and inaccurate billing.
- 🙄 High complaints rate and claim amount.

PROBLEMS
IN THE PAST

Warehouse Managers

- ✗ Low picking and packing efficiency.
- ✗ Multiple SOPs for different customers.
- ✗ Inventory Inaccuracy.
- ✗ Delayed shipping process.

SaaS

- 1 Ease billing and quick training
- 2 User-defined warehouse operation process

SaaS SOLUTION
Now

- 3 Rich reports
- 4 Remote and on-site technical support

WHY CHOOSE US

15 years' experience led to Industry-leading SaaS Provider

Our Team

We endeavor to provide clients with personalized services, expert advice and peer-to-peer information to assist them.

With one-stop SaaS, we have helped thousands of medium and large e-commerce sellers save half of their labor costs.

CASES

SaaS ERP+WMS+OMS

Case studies build credibility and trust
SaaS makes you stand out from the competition

CASE

Founded in 1984. Provides cost-effective turnkey supply chain solutions around the world ever since.

We used to have slow and inaccurate billing issues, and we could not acquire accurate inventory and provide on-time shipping. Best Inc's SaaS helped us pull bills from E-commerce platforms, and we now have full supply chain control.

CASE

Malaysia biggest 3rd-party fulfillment provider which serves 70+ clients and its daily order is above 50,000.

We suffered from low efficiency of warehouse operations. Our packing box selections relied heavily on our workers' experience. We resolved these with Best Inc's user-defined different rating rules based on handling fees, value-added service and express. Only one click to get the bills that saved us lots of time.

CASE

Dropp Logistics' warehouses fulfill over 3,000 orders on regular days and over 9,000 orders on peak season days.

We had complicated return process in the past, and high customer complaints bothered us for a long time. It was easy to optimize return process with Best Inc's solutions. The full return process in system connected the warehouse and their clients without misunderstanding.

Are you looking to streamline
your fulfillment processes and
increase profits?

Let our SaaS and 3PL take care of your fulfillment solutions.
